

DomotiGa - Bug #31

Domotiga doesn't start after 1.183

02/25/2010 01:32 PM - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:	0.1.183		
Resolution:	fixed		

Description

After updating to 1.183(SVN348) and restarting domotiga I get this error:

Unknown identifier: CGI

op regel 5050 in Main.module, this error is presented by the gambas IDE.

The line it refers to is this:

```
hHttpC.URL = "http://ajax.googleapis.com/ajax/services/language/translate?v=1.0&q=" & CGI.Encode(StrToTranslate) & "&langpair=en|"
```

By removing CGI.Encode() domotiga starts again, but I can't tell if it affects functionality or if this was just a c/p error.

History

#1 - 02/25/2010 01:41 PM - rdnzl

As of version 0.1.183 the Gambas component gb.web is needed, this is defined in the .profile file inside the [DomotiGa](#) directory, so you need to make sure you have copied this file too from your svn to your live directory.

#2 - 02/25/2010 01:42 PM - rdnzl

I mean .project file.

#3 - 02/25/2010 01:59 PM - Anonymous

I just run from the SVN-dir, looking at the [DomotiGa](#)/.project it seems it still refers to 0.1.182. It was updated with svn up, but still seems the old one. I'll just c/p the one from trunk into it and reload everything.

That makes it work again :)

Wonder why the svn update didn't change it...

#4 - 02/25/2010 04:52 PM - rdnzl

- Status changed from New to Closed

- Resolution set to fixed
